

PURPOSE

For the Caribbean States & Territories to:

- Improve use of geospatial information for decision making
- Strengthen National Spatial Data Infrastructures
- Support the integration of statistical and geospatial

information

Partners

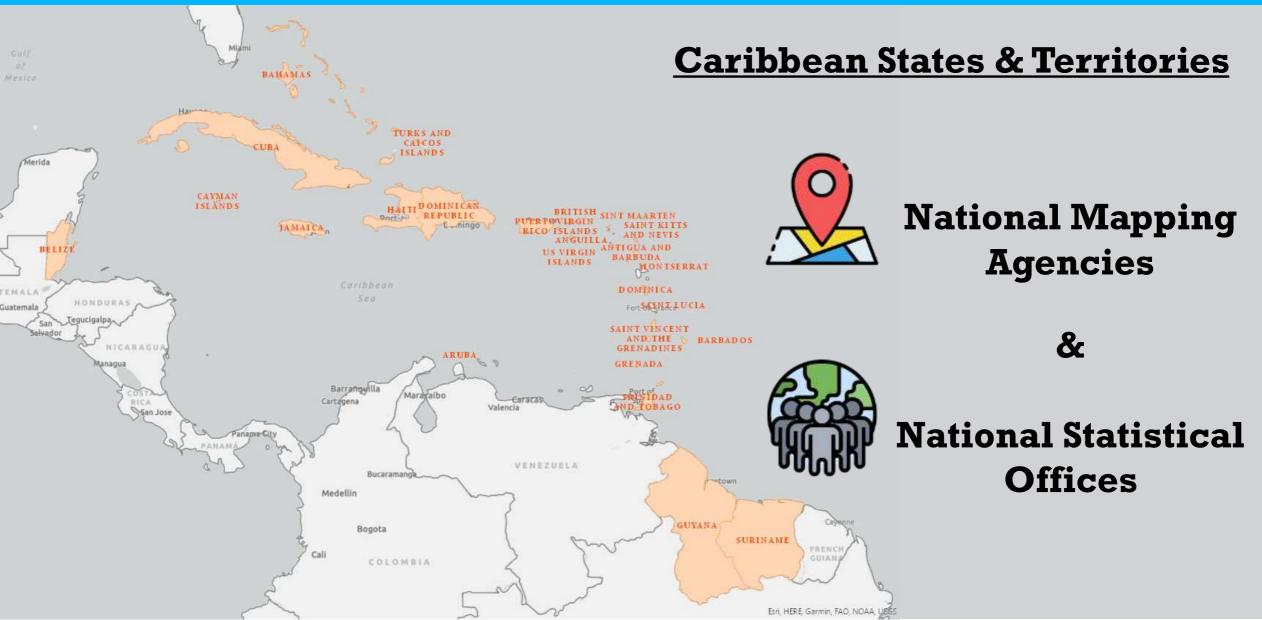

Participants

The Future We Want

- A community of spatial data producers and users is formed and remains active
- GIS and data management capacities are improved across the region
- Increased funding is available for the creation and updating of fundamental spatial datasets
- Spatial data is **shared** more broadly and **more openly** in the Caribbean
- Development decisions and **policy-formulation** take more advantage of geoinformation
- National Legislation to regulate and promote the use of geoinformation is enacted
- Agreements are instituted for collaboration and corporation on the use of geoinformation regionally
