

Progress in the implementation of national Geospatial Data Infrastructure in the Americas

Working Group SDI

Macarena Pérez García

UN-GGIM

United Nations Committee of Experts on
Global Geospatial Information Management

ggim.un.org

GENERAL

To Coordinate the actions related to the implementation, development and promotion of the Geospatial Data Infrastructures (SDIs) of the Member States of UN-GGIM Americas.

SPECIFIC

- A. To Diagnose the current status (2018) of the National Geospatial Data Infrastructures in the region, considering the components of the SDIs.
- B. To Design evaluation and monitoring tool regarding the state of progress of the National SDIs of the region.
- C. To Spread initiatives and good regional practices in the field of IDES, generating a basic guideline document regarding the operation of SDIs.
- D. To Promote and carry out training and improvement instances in the region regarding different components of the SDIs.

GENERAL CONTEXT

Regional advances in this area are disparate, and largely respond to initiatives that address the particular reality, giving answers to situations of natural risks, cadastral surveys or others, being a mission for UN-GGIM Americas, to contribute in the definition of regional policies that are linked to the Global Framework.

It is possible to understand a Geospatial Data Infrastructure (SDI) as a collection of technologies, policies and institutional arrangements that facilitate the availability and access to spatial or geographic information (GI)

OBJETIVES 2019

B. Design evaluation and monitoring tool regarding the progress status of the Regional SDI

C. Disseminate regional initiatives and good practices in the area of IDES, generating a basic guideline document regarding the operation of SDI

OBJETIVES	RESULTS	TIME LINE	
B. Design evaluation and monitoring tool regarding the progress status of the Regional SDI	Regional diagnostic survey of initiatives in terms of use, standards and other elements associated with the use of IDES in the region. Systematization of information. Web documentation repository	*Report *Dashboard • Matrix of information (related with 2018-2019 survey)	Marzo 2019- Junio 2019 Julio 2019- Diciembre 2019
C. Disseminate regional initiatives and good practices in the area of IDES, generating a basic guideline document regarding the operation of SDI		* Web documentation repository	Julio 2019- Diciembre 2019

ggim.un.org

Who will answer the survey?

Representative of each country in the regional committee.

*For example the professional in charge of the SDI

what do we want to know?

State of the components of the SDI

Design an indicator

how will we show the results

Regional SDI indicator variability years 2018 - 2019 by component: Human Resources

Final thoughts

- Regional challenge in both the application of an indicator
- About the preliminary results ... a challenge to understand or explain the results
- The importance of every country participate, study the results. Share the information of good practices and examples.
