Analysis of priorities for regional statistical development

MULTIDOMAIN

Analysis of priorities for regional statistical development

OTHER CROSS-CUTTING ISSUES

Multidomain and other cross-cutting issues

Questionnaire results for regional priorities:

HIGH PRIORITY

- Sustainable Development Goals (14 countries)
- Geospatial information / GIS (5 countries)

Questionnaire results for regional priorities: HIGH PRIORITY

Sustainable Development Goals: challenges identified by countries

- Statistical Coordination Group / IAEG-HLG
- Regional framework
- Capacity building
- SDG 3, 4, 8, 11, 12, 13, 14 y 15
- NSS and SDG; coordination mechanisms
- Tier II and III indicators
- Experiences / lessons learned
- Information desegregations
- SDG National reports / SDG indicators dissemination
- Indicators methodology

Sustainable Development Goals

Strategic Plan 2015 – 2025

3. Vision for 2025

The **Statistical Conference of the Americas of ECLAC** will consolidate its position as the main forum for regional and international cooperation and coordination on official statistics in Latin America and the Caribbean, especially with regard to developing the capacities of national statistical systems to respond effectively to the challenges of modernizing and strengthening their legal and management frameworks, to close the gaps in coverage and quality that persist in various thematic fields and to prepare the statistics that will be required for **monitoring the goals and targets of the 2030 Agenda for Sustainable Development**.

Approved in the Eight Meeting of the Statistical Conference of the Americas of the Economic Commission for Latin America and the Caribbean, Quito, Ecuador

Sustainable Development Goals

- Consolidation of the Statistical Coordination Group for the Agenda 2030 in LAC according to its terms of reference
- Promoting of the coordination and collaboration with UN Statistical System within the framework of the SCA
- Promoting of the coordination and collaboration with sub-regional instances within the framework of the SCA
- Up-dating the national capabilities diagnosis of the SDG indicators production
- Regional prioritization review
- Feasibility analysis for the production of Tier II and III indicators at regional level
- Information disaggregation
- Strengthening of the coordination mechanism for the production of SDG indicators at national level
- Capacity building / technical assistance / peer cooperation
- Dissemination platforms of SDG indicators / electronic data exchange mechanisms / Open-data

Questionnaire results for regional priorities: HIGH PRIORITY

Geospatial information / GIS: challenges identifies by countries

- Georeferenced / census data
- Cartography
- SDI
- Digitalization and geocodification
- Technological support
- Capacity building

Geospatial information / GIS

Strategic Plan 2015 – 2025

Strategic goal 1; Specific goal 4:

“Specific goal 4: To promote systemic linkages between and the integration of statistical production and geography. “

Approved in the Eighth Meeting of the Statistical Conference of the Americas of the Economic Commission for Latin America and the Caribbean, Quito, Ecuador

Geospatial information / GIS

Challenges for the region

- Consolidation of the joint work with UNGGIM-Americas
- Promoting the partnership with other geospatial instances of the region within the framework of the SCA
- Support in the implementation of MEGA (Statistical Geospatial Framework of the Americas)
- SDI – Spatial Data Infrastructure / regional / national
- Satellite images use
- Strengthening of the coordination mechanisms for the statistical and geospatial integration
- Human and technological resources profiles identification in the NSS
- Capacity building / technical assistance / peer cooperation

Multidomain and other cross-cutting issues

Questionnaire results for regional priorities:

HIGH AND MEDIUM PRIORITY

- **Sustainable Development Goals** (18 countries)
- Gender and other population groups (17 countries)
- **Geospatial information / GIS** (15 countries)
- Information dissemination (15 countries)
- Technological resources – electronic data exchange (15 countries)
- ...

Questionnaire results for regional priorities: HIGH AND MEDIUM PRIORITY

Gender

- Strengthen the cross-cutting gender focus in the production, development and dissemination of statistics in the NSS ("leave no one behind") for the monitoring of gender equality
- Maintain the link between the set of prioritized indicators at the regional level and the regional commitments of the Regional Gender Agenda
- Strengthen the methodological work of time use surveys, surveys of violence against women, measurement of femicide, among others
- Strengthen inter-institutional alliances between producers and users

Questionnaire results for regional priorities: HIGH AND MEDIUM PRIORITY

Information dissemination / electronic data exchange

- On-line dissemination platforms / dashboards
- Open-data for official statistics
- Good practices in data dissemination at national / regional / global level
- Geoportals
- SDMX
